SKILLS

Java, Python, PHP, Node.js, Dart, JavaScript, TypeScript, C, SQL, NoSQL, React.js, Angular, Next.js, SvelteKit, Express.js, PHP, **Flutter**, Ionic, Java, React Native, iOS/Android Development, ElectronJS, C++ (Qt Framework), **TensorFlow**, AI Chatbots, Image Generative Models, LLMs (Large Language Models), **Real-Time Avatars**, Firebase Services, AWS, SQL, NoSQL (e.g., MongoDB, DynamoDB), Git, GitHub, GitLab, Docker, Agile, Microservices, Unit Testing, Integration Testing, Component Testing, **VEEVA** CLM Components, Approved Email Templates, Event Management Tools

WORK EXPERIENCE

Ntam Group (Delta Plus Event Management): *Software Developer*   ***Dubai*** *06/2024 - Current*

- Designed and launched **10+ scalable web applications** using Angular, React, Next.js, and PHP for global clients like **L'Oréal, Abbott, and Merck**, improving development efficiency by **15%.**
- Built **5+ cross-platform mobile applications** (Android & iOS) using Flutter, Ionic, Java, and React Native for clients including **Pfizer and L'Oréal**, resulting in enhanced usability and **10% higher user satisfaction scores.**
- Developed **3 desktop applications** for Mac and Windows using **Flutter and ElectronJS**, reducing manual processes for Nestlé and other clients by **20%.**
- Created **AI chatbots** and image-generative models in Python for **interactive events**, enabling **real-time user interactions** and driving engagement at key events.
- Delivered **real-time talking avatars** with Python, Next.js, and AI, introducing cutting-edge features that improved audience interaction rates by **10% (Novartis, Merck).**
- Managed and optimized large-scale SQL and NoSQL databases for multiple clients, ensuring seamless handling of data-intensive operations and reducing query response times.
- Conducted **extensive testing** (unit, component, and integration) across platforms, improving system reliability and reducing bugs by **25%.**
- Streamlined version control workflows using GitHub and GitLab, enabling faster deployment cycles and collaboration within cross-functional teams.
- Created and maintained **50+ VEEVA CLM components** and approved email templates, enhancing pharma clients' efficiency in managing HCP communications.
- Delivered applications for pharma clients to improve HCP engagement, resulting in more streamlined communication workflows and better user adoption rates.

Indus Real Estate LLC: *Full-Stack Engineer*   ***Dubai*** *12/2022 - 06/2024*

- Led multidisciplinary team to design, develop, and launch multiple websites; prioritized and **resolved 100+ new features and bug fixes.**
- Executed updates and enhancements to real estate websites, **resulting in a notable 15% increase in user engagement**, as measured by key metrics such as page views, time spent on site, and user interactions.
- Designed and implemented a **cloud Content Management System (CMS)** for real estate websites using AngularJS and Node.js, **resulting in a 30% increase in content management efficiency and improvement in communication effectiveness.**
- Led the orchestration of a cross-platform Flutter app with QR scanning and backend integration in PHP, Node.js, and SQL, streamlining event management. **Achieved 10% increase in user engagement.**
- Crafted a user-friendly interface optimized for both **iOS and Android platforms**, ensuring seamless usability and accessibility for event staff and attendees, **resulting in a remarkable 50% reduction in time** spent on maintaining event clients.
- Conducted extensive training sessions and ongoing support for company staff, **resulting in widespread adoption and proficient utilization** of the app for event management and attendance tracking.

Dosii: *Flutter Developer*   *India* *06/2022 - 12/2022*

- Spearheaded the development of a web app aiding university students in college selection and admissions planning, **featuring score tracking and admission probability analysis.**
- Earned recognition from prestigious institutions**, underscoring the app's impact and credibility in education.**
- Engineered a backend application utilizing **Next.js**, enabling seamless transitions between user authentication types through **Google JWT integration.**
- This innovative solution **resulted in a 40% reduction in authentication-related errors and a 25% improvement in overall user satisfaction rates.**
- Completed the creation of **over 50 features and widgets in Flutter web, leveraging Flutter SDK metrics** to ensure optimal performance and functionality.

Brototype: *Flutter Developer Intern*   *India* *11/2021 - 04/2022*

- Constructed and developed a music mobile application using **Flutter, enabling users to create playlists, mark favorites, and enjoy shuffled playback, enhancing user experience and engagement**
- Tested and deployed app with more than **5+ features**.
- Demonstrated proficiency in Flutter development through the successful completion of a music app project, showcasing creativity and technical skills in delivering intuitive and feature-rich mobile applications.

EDUCATION

Crossroads Software Engineering Bootcamp   *India* *08/2020 - 11/2021*

- Completed an intensive one-year bootcamp specializing in mobile and web application development, as well as backend services.
- Acquired proficiency in agile methodologies, version control, and practical implementation through hands-on projects and collaborative teamwork, **including the successful development of over 10 applications.**
